

7th Lunch Seminar 28.11.13

12:00-13:15 Kristine Bonnevis House, Blindern – Auditorium 2

Life after PhD - Where do people work?

The PhD-forum at the Department of Biosciences in collaboration with Biostruct invites to an autumn seminar-series about life after the PhD. People that have taken a PhD in life science, and now work outside of academia come and tell about their experience. What have they done after the PhD, where do they work, and how did they end up there? What kind of skills apart from the scientific background has been valuable to them?

Program:

- 12:00 **Welcome - coffee and cake**
- 12:15 - 12:45 **Talk by Trine Johansen Meza**
- **The Norwegian Agency for Quality Assurance in Education**
- 12:45 - 13:15 **Talk by Turid Eide**
- **Special advisor and secretary at OUS**

Trine Johansen Meza has her PhD from the Department of Biosciences under the supervision of Reidunn B. Aalen and Kjetill S. Jakobsen. After the thesis defense she worked over ten years as a scientist at UiO. Today Trine is working as an Assistant Deputy Director General in the Department of Quality Assurance in NOKUT, the professionally independent government agency that contributes towards quality assurance and enhancement in higher education and tertiary vocational education.

Turid Eide has taken a PhD in cell signaling at the Department of Medical Biochemistry, under the supervision of Kjetil Taskèn. At present she is working as a special advisor at the department of research administration and BioBank at Oslo University Hospital (OUS) where her main focus is human research biobanks. Turid is also a secretary in the BioBank and Registry Committee at OUS.

All from Department of Biosciences and BioStruct are welcome, and we encourage our master students to come.

The talk is open for all interested participants. Coffee and cakes will be served from 12.00

Norwegian Graduate school in Structural Biology -A collaboration between 5 universities
