

8th Lunch Seminar 30.01.14

12:00-12:45 Kristine Bonnevis House, Blindern – Auditorium 2

Life after PhD - Where do people work?

The PhD-forum at the Department of Biosciences in collaboration with Biostruct invites to a spring seminar-series about life after the PhD. People that have taken a PhD in life science, and now work outside of academia come and tell about their experience. What have they done after the PhD, where do they work, and how did they end up there? What kind of skills apart from the scientific background has been valuable to them?

Program:

12:00 Welcome - coffee and cake
12:15 - 12:45 Talk by Hans Petter Rebo
- Statoil

Hans Petter Rebo has his Ph.D. from NTNU in catalyst deactivation, experiments and modelling. He made his career within Statoil, having a diversity of projects and responsibilities. Starting out as a trainee within refining and business development he was later heavily involved in the CO₂ capture projects at Mongstad. In 2010 he became the General Secretary for KonKraft. KonKraft is a cooperation tool between oil and gas producers to raise central issues for the whole industry. At present he is working with the corporate technology strategy and Statoil's technology portfolio.

All from Department of Biosciences and BioStruct are welcome, and we encourage our master students to come.

The talk is open for all interested participants. Coffee and cakes will be served from 12.00

Norwegian Graduate school in Structural Biology -A collaboration between 5 universities

BioStruct

The BioStruct logo features a stylized molecular structure in white and blue to the left of the text "BioStruct" in a large, bold, black, serif font.
