LECTURES / ANALYSIS / KNOWLEDGEBASE / TERM BANK / MEDIA BANK / STUDENT ACTIVITIES

The Lectures presented in Ergonet differ from ordinary OT textbooks. Practical knowledge is exemplified by film in combination with analysed text. It presents historical events or ideas, for example how to make adaptations in the environment for disabled children. It can be stories told by clients and their families of how disability affects their lives, or it can be Occupational Therapists and teachers sharing their knowledge. The intention is to stimulate the students to see the relationships between different phenomena, and the integration of theory and practice related to actions supporting clients to participate in meaningful occupations. Hopefully the lectures will stimulate students to further reading.

P Living with autism	---	Developmental	Knowledge	publish	unpublish	remove

ERGONET [Admin-meny](#)

LECTURES / **ANALYSIS** / KNOWLEDGEBASE / TERM BANK / MEDIA BANK / STUDENT ACTIVITIES

The Analysis shows videotaped clinical situations of occupational therapists and clients working together or clients alone performing activities. They are divided in short film cuts that are combined with text. This text combines descriptions, analyses and reflections on the attitudes, skills and knowledge needed in the clinical situation. Photos and central concepts from the knowledgebase can be added and opened in the text. The text is often linked to other relevant parts of Ergonet, or to internet sites. Through the analysis, students can come to understand how Occupational Therapists use their practical knowledge when choosing the best professional and ethical actions for a particular client. It also demonstrates how the environment and occupations influence a client's health and occupational performance.

TITLE	AGE	CLIENT, HEALTH, ILLNESS	OCCUPATIONAL THERAPY	Admin
P Mobility training with a client following a CVA	41-65	Neurological	Intervention	publish unpublish remove
P Dressing techniques for a client following a CVA	41-65	Neurological	Intervention	publish unpublish remove
