Maria Frolova	NARFU, Russia	Facility monitoring and management system to improve the indoor climate and reduce environmental impact. Pilot project at NARFU dormitory
Eero Nippala	TAMK, Finland	Renovation strategy in Finland

This event is Supported by the project:

FAMARB (Facility Management of Residential Buildings in Barents Region)

The webinar is a planned event under the Famarb project, funded by an EU Kolarctic CBC program. Facility management (FM) is a profession that encompasses multiple disciplines to ensure functionality, comfort, safety and efficiency of the built environment by integrating people, place, process and technology.

The project will bring effective operation and management of buildings of the Barents region into action by adapting concepts of energy efficiency and energy saving through upgrading or renovation.
